UOP, Inc.
N.E. County Road
Postville, Iowa 52162

Dear Mr. Sparks:

We have reviewed your letter of November 22, 1982, certifying that the facility noted above will continue to operate only as a regulated generator. In addition, you have certified that the above noted storage facility has been closed and free of spill residues. The Iowa Department of Environmental Quality (IDEQ) has in a letter of December 3, 1982, confirmed that the former storage facility is clear of spill residues and that all required closure certifications have been received. They also indicated that their recent inspections verified that you are operating the facility in compliance with regulations and as a regulated generator only.

Based on these certifications and verification of same by IDEQ staff, we are rescinding our call of March 4, 1982, for a Part B application. Accordingly, by this letter we, in cooperation with IDEQ, are taking the first step toward terminating interim status for your Postville, Iowa facility. You will receive a letter in the near future from IDEQ that will officially complete that action.

We appreciated the excellent cooperation of Mr. George Stunyo and your staff in revising the facility's notification forms and addressing all the relevant closure issues promptly.

Sincerely yours,

Robert L. Morby
Chief, Waste Management Branch
Air and Waste Management Division
